

Rec. PA6 mono material solution by Nifco

Nifco's plastic fasteners greatly surprised the industry with their light weight, easy to use features. Our leading innovations have changed the automobile manufacturing process, leading to cars with greater safety, less weight, more comfort and reduced environmental impact. We are expanding the use of this technology to spark innovations in home life and appliances as well as sports and outdoor equipment. Nifco will continue to lead the way for a comfortable life and a sustainable society.
